Abstract

This article describes the requirements of the Gaudí website which must enable the quest of making the art of system architecting more accessible and understandable.

Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.

Key drivers of the website

Accessibility

for the readers

- Direct access to most relevant information
- Direct visibility of most relevant information
- Availability of supporting information
- Papers and presentations high quality printable
- High image quality of presentations on screen with a resolution of 1024*768 or better
- Simple navigation
- Navigation support for different viewpoints
- Standard browsers and common plug-ins
- Clear value or status indication
- Findable via Internet search engines

Productivity

of the author

- Information only defined once
- Predictable results of the tools
- Low infrastructure effort
- Scoping support for different levels of openness (Research, Philips, WWW)

Quality

of the information

Not determined by tools or infrastructure
