## Abstract

This nugget shows a profile of a system architect for a large list of system architect related characteristics. This profile is based on personal observations and experience.

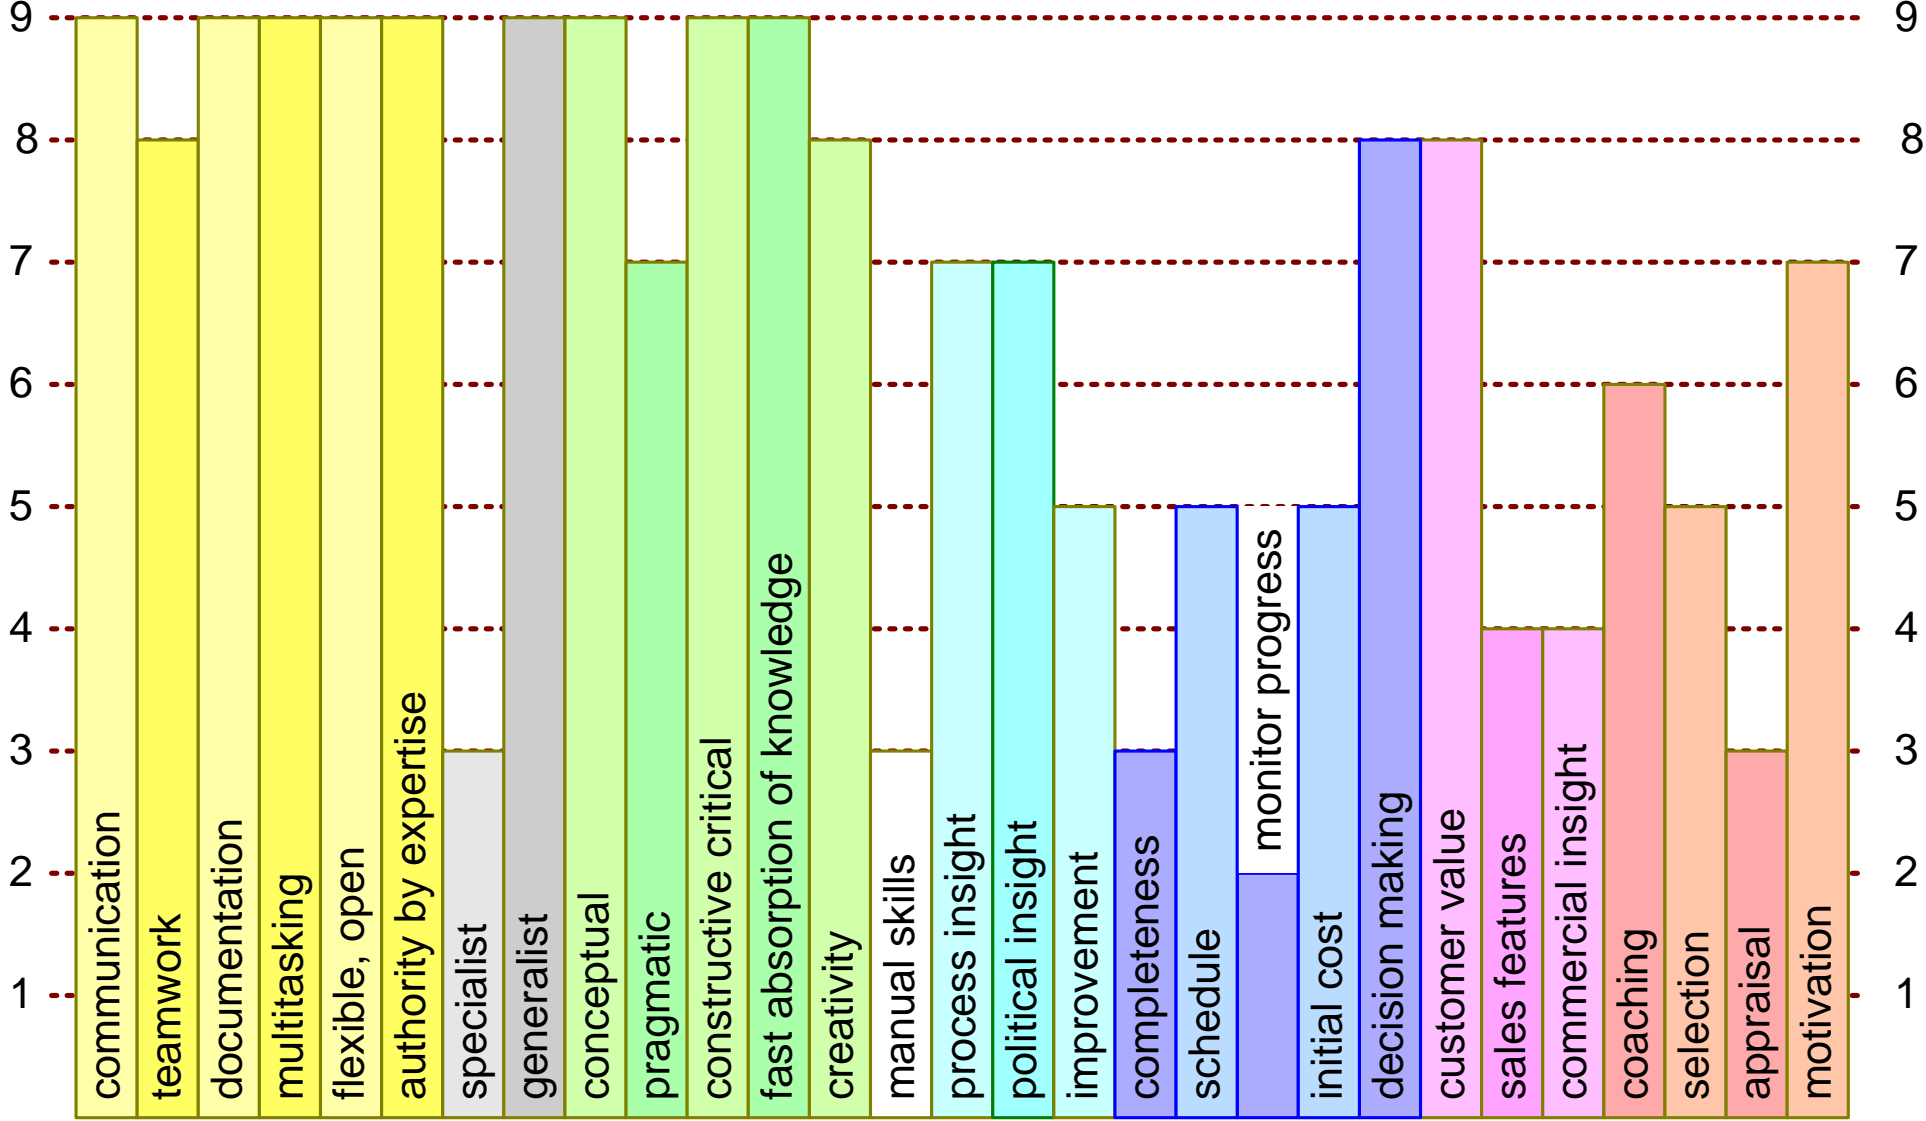

### Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.

# System Architect

# Most Discriminating Properties for Architects

---

Generalist

Multi-tasking

Authority by expertise

Balance between conceptual and pragmatic

# Team Work is Essential

---

In practice, we are unable to find “ideal” **individuals** as architects.

We always work in teams, where the (architecting) **team** needs to be close to the ideal profile.

However, **partitioning** the architecting role is a **contradiction** in itself.

A “**Primus inter pares**” (The number one between equals) is essential for maintaining the **big picture**.
