Abstract

Many organizations gradually fragment their workforce and the work of individuals. Fragmentation causes context switching, which takes time and energy. Ultimately, the efficiency gets too low. Countering fragmentation improves focus, efficiency, and effectiveness.

Distribution

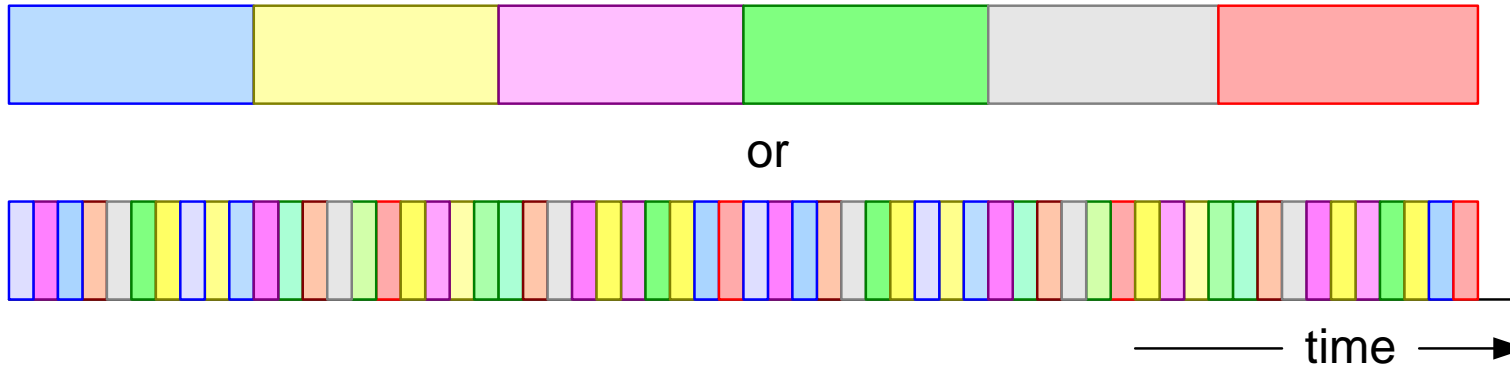

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.

Concurrency and Fragmentation lower efficiency

How many (semi-)concurrent tasks can a person handle?
Working in burst-mode (concentrating on one task for one day, week or month) can increase efficiency.

six tasks in parallel:
all results are late

six tasks sequential
first result in 1/6 of time!

One person will be member of multiple teams
